# What Is a Business Model?

---

The term business model refers to a company's plan for making a **profit**. It identifies the products or services the business plans to sell, its identified target market, and any anticipated expenses.

Business models are important for both new and established businesses. They help new, developing companies attract investment, recruit talent, and motivate management and staff.

Established businesses should regularly update their business model or they'll fail to anticipate trends and challenges ahead. Business models also help investors evaluate companies that interest them and employees understand the future of a company they may aspire to join.

## What Is a Business Model? Continue.....

---

The two primary levers of a company's business model are pricing and costs. A company can raise prices, and it can find inventory at reduced costs. Both actions increase gross profit. Many analysts consider gross profit to be more important in evaluating a business plan.

A good gross profit suggests a sound business plan. If expenses are out of control, the management team could be at fault, and the problems are correctable. As this suggests, many analysts believe that companies that run on the best business models can run themselves.

## Business Model:Swiggy

---

Swiggy operates on a multi-faceted business model:

**Commission-Based Revenue:** Swiggy charges restaurants a commission for every order placed through its platform. This fee varies based on factors like location, restaurant popularity, and order volume.

**Delivery Fees:** Customers are charged a delivery fee, which can fluctuate based on distance, order value, and demand.

**Subscription Services:** Swiggy offers subscription plans like "Swiggy One," providing benefits such as free deliveries and exclusive discounts for a monthly or annual fee.

**Advertising and Promotions:** Restaurants can pay for enhanced visibility on the platform through sponsored listings and advertisements, generating additional revenue for Swiggy.

## Business Model Canvas – A tool

## Introduction

---

The Business Model Canvas is a strategic management and entrepreneurial tool. It allows you to describe, design, challenge, invent, and pivot your business model.

**A Business Model Canvas (BMC) is a simple visual tool used to describe, design, and analyze a business model. It's typically divided into 9 key building blocks that show how a company creates, delivers, and captures value.**

Whether it be in small business entrepreneurship or large corporate product launches, the business model sits at the center. The one thing that stands at the very heart of the daily operations of an organization, is a model that dictates where the opportunity lies and how the company effectively acts on it at each step in the process.

# business model ?

- “A business model describes the rationale of how an organization **creates, delivers, and captures** value”

### Annexes

---

# Recent trends in Techno- Entrepreneurship

## Recent Trends in Techno-Entrepreneurship

---

### Artificial Intelligence (AI)-Driven Startups

AI is now the **core driver of new ventures**, not just a support tool

Startups use AI for:

- Automation

- Predictive analytics

- Personalized services

Even small firms and MSMEs are leveraging AI to compete globally

Trend shift: From “tech-enabled” → **“AI-first businesses”**

# Recent Trends in Techno-Entrepreneurship

---

## Rise of Generative AI & Autonomous Systems

Tools like generative AI and AI agents are acting as:

- Content creators

- Virtual employees

Startups can operate with **very small teams but high output**

Example: AI chatbots, AI tutors, automated coding platforms

## Hyperautomation & Low-Code/No-Code Platforms

Entrepreneurs can build businesses **without deep technical skills**

Technologies:

- Low-code platforms

- Automation tools

Reduces:

- Cost

- Time-to-market

**D Y PATIL**  
UNIVERSITY  
NAVI MUMBAI

## Recent Trends in Techno-Entrepreneurship

---

### Sustainability & Green Tech Startups

Focus on:

- Renewable energy

- Eco-friendly products

Consumers demand ethical and sustainable solutions

Trend: “Profit + Purpose” business models

### Remote & Borderless Entrepreneurship

Startups operate globally from day one

Remote work + digital tools enable:

- Global teams

- International markets

Concept: **Location-independent startups**

**D Y PATIL**  
UNIVERSITY  
NAVI MUMBAI

## Recent Trends in Techno-Entrepreneurship

---

### **Data-Driven Decision Making**

Startups rely heavily on:

- Big data

- Real-time analytics

Improves:

- Customer targeting

- Operational efficiency

Trend: “Data is the new capital”

### **Digital Platforms & Ecosystem-Based Models**

Growth of:

- Platform businesses (apps, marketplaces)

- Subscription models

Enabled by digital infrastructure (e.g., UPI, cloud systems in India)

Example: EdTech, FinTech, HealthTech platforms

## Recent Trends in Techno-Entrepreneurship

---

### **Inclusive & Tier-2/Tier-3 Entrepreneurship (India Focus)**

Innovation is expanding beyond metros

Growth drivers:

- Government initiatives

- Digital penetration

Rise of:

- Women entrepreneurs

- Rural startups

Trend: **Decentralized innovation ecosystem**

### **Cybersecurity & Trust-Based Innovation**

With digital expansion, startups focus on:

- Data privacy

- Secure platforms

Rise of:

- Zero-trust systems

- Quantum-safe encryption

## Recent Trends in Techno-Entrepreneurship

---

### Deep Tech Innovations (Quantum, Biotech, Blockchain)

Emerging areas:

- Quantum computing

- Biotechnology

- Blockchain

Example: AI in drug discovery, gene editing, and smart contracts

Trend: High-investment, high-impact ventures
